Fox Hollies School E-safety Policy

Creating a Safe ICT Infrastructure in School

All users of the school’s computer network have clearly defined access rights, enforced using a username/password login system. Account privileges are achieved through the file/folder permissions, and are based upon each user’s particular requirements – children have much more limitations in place through a standard key stage login than individual staff members do with their personal logins, for example. This helps to protect the network from accidental or malicious attempts to threaten the security of it or the data accessible using it.

Guests (e.g. supply teachers) are requested to login using a visitor login to prevent them viewing any potentially confidential data that might be stored on the schools’ drives.

A permanently-enabled filtering system is provided, which is designed to filter out material found to be inappropriate for use in the education environment. As an additional safety measure, each individual web page is also dynamically scanned for inappropriate content as it is requested, categorised by its content and then access prevented to it if necessary.

Access to make changes to over-right the base-default setting to allow or deny access to a particular website URL can be achieved by contacting the ICT co-ordinator. All changes made to Internet filtering are logged by them to help prevent abuse of the system.

Security software is installed on all Windows machines to prevent any malware (e.g. virus) attacks.

Staff should be aware that Internet traffic is monitored and can be traced to the individual user. Professional conduct is essential. It is the responsibility of the user to ensure that they have logged off the system when they have completed their task and to keep their user credentials confidential to halt impersonation on the network.
Rules for Publishing Material Online (inc. Images of Pupils)

Whilst we wish the school’s website to be a valuable tool for sharing information and promoting children’s achievements with a global audience, we do recognise the potential for abuse that material published may attract, no matter how small this risk may be. Therefore, when considering material for publication on the website, the following principles should be borne in mind, in accordance with the school’s Safe Guarding Policy:

- **All staff** are responsible for checking the names of children who are not allowed to have their photographs published online by the request of their parents.
- If an image/audio/video recording of a child is used then they should not be named (including in credits).
- If a pupil is named, their image/audio/video recording should not be used (no surnames should be published).
- Files should be appropriately named in accordance with these principles and care should be taken to include only suitable ALT tags as well.
- Only images of children in suitable dress should be used and group photographs are preferred in preference to individual photographs.
- Parents are given the opportunity to withdraw permission for the school to publish images/audio/video of their child on the school website.
- Content should not infringe the intellectual property rights of others – copyright may apply to: text, images, music or video that originate from other sources. All copied or embedded content should be properly referenced.
- Content should be polite and respect others.
- Material should be proof-read (e.g. to check for spelling or grammatical errors) before being published.

Comments submitted to posts on the website must be moderated by the post’s author before being published (to ensure they are appropriate and reveal no personal information).

Children will likely use a variety of online tools for educational purposes during their time at the school. They will be asked to only use their first name or a suitable avatar for any work that will be publicly accessible and be required to follow the principles listed above before sending any work for publishing. Staff should encourage contributions that are worthwhile and develop a particular discussion topic.

When photo/videos of school events (e.g. plays) are permitted to be taken by watching parents for personal memories, they will asked not published them onto any public area of the Internet, including social networking sites.
Pupils’ Rules for Acceptable Internet Use

Educational use of the Internet is characterised by activities that provide children with appropriate learning experiences. Clear rules which help children develop a responsible attitude to the use of the Internet have been devised. Clear expectations and rules regarding use of the Internet will be explained to all classes. A copy of them is sent home to the parents of any new child and a simplified version is also displayed within school to ensure that everybody is made aware of them.

- I will ask permission from a member of staff before using the Internet.
- I will respect the facilities on offer by using them safely and appropriately.
- I will not deliberately seek out inappropriate websites.
- I will report any unpleasant material to a member of staff immediately because this will help protect other pupils and myself.
- I will not download/install program files.
- I will ask permission before completing and sending forms/emails.
- I will be polite and respect others when communicating over the Internet.
- I will not give out any personal information over the Internet.
- I will not share my login details for websites with others.
- I understand that the school may check my computer files and monitor the Internet sites I visit.

Children are taught about passwords from entry into the school that includes why and how we need to keep them safe.
Visitor's Rules for Acceptable Internet Use

Whilst the nature of a visitor’s Internet use will clearly vary depending upon the purpose of their visit, it is still important to explain the school’s expectations and rules regarding safe and appropriate Internet use to them. These differ slightly to those given to pupils to acknowledge the different situations in which visitors will likely be using the Internet:

- I will respect the facilities on offer by using them safely and appropriately.
- I will not use the Internet for: personal financial gain, political purposes, advertising, personal or private business.
- I will not deliberately seek out inappropriate websites.
- I will report any unpleasant material to a member of staff immediately because this will help protect myself and others.
- I will not download/install program files to prevent data from being corrupted and to minimise the risk of viruses.
- I will be polite and respect others when communicating over the Internet.
- I will not share my login details for websites with others.
- I will not carry out personal or unnecessary printing when using the Internet due to the high cost of ink.
- I understand that the school may check my computer files and monitor the Internet sites I visit.

Staff/Governor’s Rules for Acceptable Internet Use

Staff and governors are contractually obliged to use the Internet safely, appropriately and professionally within school, following the same expectations and rules as given to visitors. They are aware that they are role models for others and so should promote and model the high expected standards of behaviour at all times.

Whilst checking of personal sites (e.g. emails) is permitted outside of pupil contact time, it is recognised that this should only happen for brief periods of time and is merely a privilege (not a right) and thus can be removed at any time.
Acceptable Use Agreements

Both pupils and their parents/guardians are asked to read the school’s Acceptable Use Agreement and are required to consent to them before independent access to the Internet is allowed for them within school:

- Pupils will need to agree to use it in a safe and responsible way, observing all of the restrictions explained to them.
- Parents will need to acknowledge that whilst the school will take reasonable precautions to prevent children from accessing inappropriate materials, the school will not ultimately be held responsible for the nature of the content they access and that they will be deemed to be accountable for their own actions.

E-Safety Education & Training

Whilst regulation and technical solutions are very important, their use must be balanced by educating users of potential e-safety risks as well as how to develop safe and responsible behaviours to minimise them, wherever and whenever they go online.

E-Safety education will be provided in the following ways:

E-Safety Training for Staff and Governors

Staff and governors receive regular training about how to protect and conduct themselves professionally online and to ensure that they have a good awareness of issues surrounding modern technologies, including safeguarding. They are also directed to relevant websites to help support their understanding of these issues.

E-Safety Training for Parents

The school understands that everyone has a role to play in empowering children to stay safe while they enjoy new technologies, just as it is everyone’s responsibility to keep children safe in the non-digital world.

For these reasons, the school provides opportunities for parents/carers to receive e-safety education and information (e.g. via the school website) to enable them to better understand the issues surrounding new technologies and to help them support their children in developing good e-safety behaviour – this includes delivery via newsletters and the school website.

Guidance on the use of Social Networking and messaging systems

The school recognises that many staff will actively use Facebook, Twitter and other such: social networking, blogging and messaging services, including to support their own professional development by developing personal learning networks with other educational practitioners.
Staff must recognise that it is not appropriate to discuss issues relating to children or other staff via these networks – discretion and professional conduct is essential. They are encouraged to review their privacy settings to make sure that their profiles and photographs are not viewable by the general public.

In accordance with school’s Safeguarding Policy, it is never acceptable to accept a friendship request from a child from the school as in almost all cases children of primary age using such networks will be breaching the terms and conditions of use of those networks. It is also extremely inadvisable to accept as friends, ex-pupils who are still minors to again avoid any possible misinterpretation of their motives or behaviour which could be construed as grooming. Staff should also exercise caution when they are friends with parents of students at the school on social media, in the same way that they would in direct relationships with them.

Staff should not give their personal contact details to pupils including e-mail, home or mobile telephone numbers. All correspondence should be via school systems.

Data Protection

All data held on the school’s network is subject to the Data Protection Act 1998 and the school’s Child Protection Policy.

Unlicensed or personal software must not be installed on the school’s hardware or connected in any way to the school’s equipment or systems. If software is deemed to be of use to the school then it should be duly acquired by the school under licence.

Where data of a personal nature such as: school reports, IEPs, correspondence and assessment data is taken home on a school laptop or other portable storage media, it must be recognised that this data comes under the Data Protection Act and is subject to the school’s Safeguarding Policy. Care must therefore be taken to ensure its integrity and security. It should be removed from any portable device including USB pens and memory cards as soon as possible. Staff are required to provide written consent to a responsible use contract before being allowed to take home school equipment (e.g. teacher laptops).

Where authorisation has been given to a specific user to use a potable storage medium (e.g. memory stick) it is his/her responsibility to ensure that it does not transmit any viruses onto the school’s network. It is recommended that pupils refrain from using such media unattended.

Staff are encouraged to use the drives on the school network as a central repository for documents such as policy and planning files. Confidential pupil data may be safely stored here as access is only permissible through login by a member of school staff.

All pupil work is stored in their own personal folder on the network. Children’s files cannot be moved or deleted whilst logged onto a machine as a pupil user.
The servers containing these networked drives are locked away each night as an extra security measure to prevent against theft.

**Data Backups**

Data stored on the school’s networked drives are backed up regularly so that copies of files may be recovered if the original becomes either lost or damaged.

**Responding to Unacceptable Internet Use by Pupils**

Pupils should be made aware that all e-safety concerns will be dealt with: promptly, sensitively and effectively so that they will feel able and safe to report any incidents.

Children are encouraged to respect the facilities offered to them, however staff are trained in how to proceed following a breach of the Rules for Acceptable Internet Use, in accordance with the school’s Safeguarding Policy. This includes guidance on preservation of evidence and immediate reporting – the school’s child protection officer has overall responsibility for Internet safety so any misuse should be reported to them without delay.

Depending on the severity and nature of the misuse offence, sanctions include: first warnings, temporary bans from using the ICT resources and meetings with parents/carers, all in accordance with the school’s Behaviour Policy and in consideration of the age of the child.

All incidents should be recorded in the school’s behaviour log book.

A ‘report abuse’ button is visible on every page of the school’s website for children to click on if they are concerned about something that has happened online whilst they are on the Internet at home (e.g. cyber-bullying). This takes them to a portal to gain support and advice from the Child Exploitation and Online Protection Agency.

**Responding to Unacceptable Internet Use by Staff and Visitors**

Failure to comply with the Rules for Responsible Internet Use could lead to sanctions being imposed and possible disciplinary action being taken, in accordance with the school’s Safeguarding Policy and the law. Misuse should be reported without delay.

**Policy Review**

This policy is reviewed regularly to respond to any significant new developments in the use of technologies, new threats to e-safety or incidents that have taken place.
Policy approved by the WGB:
